# Design

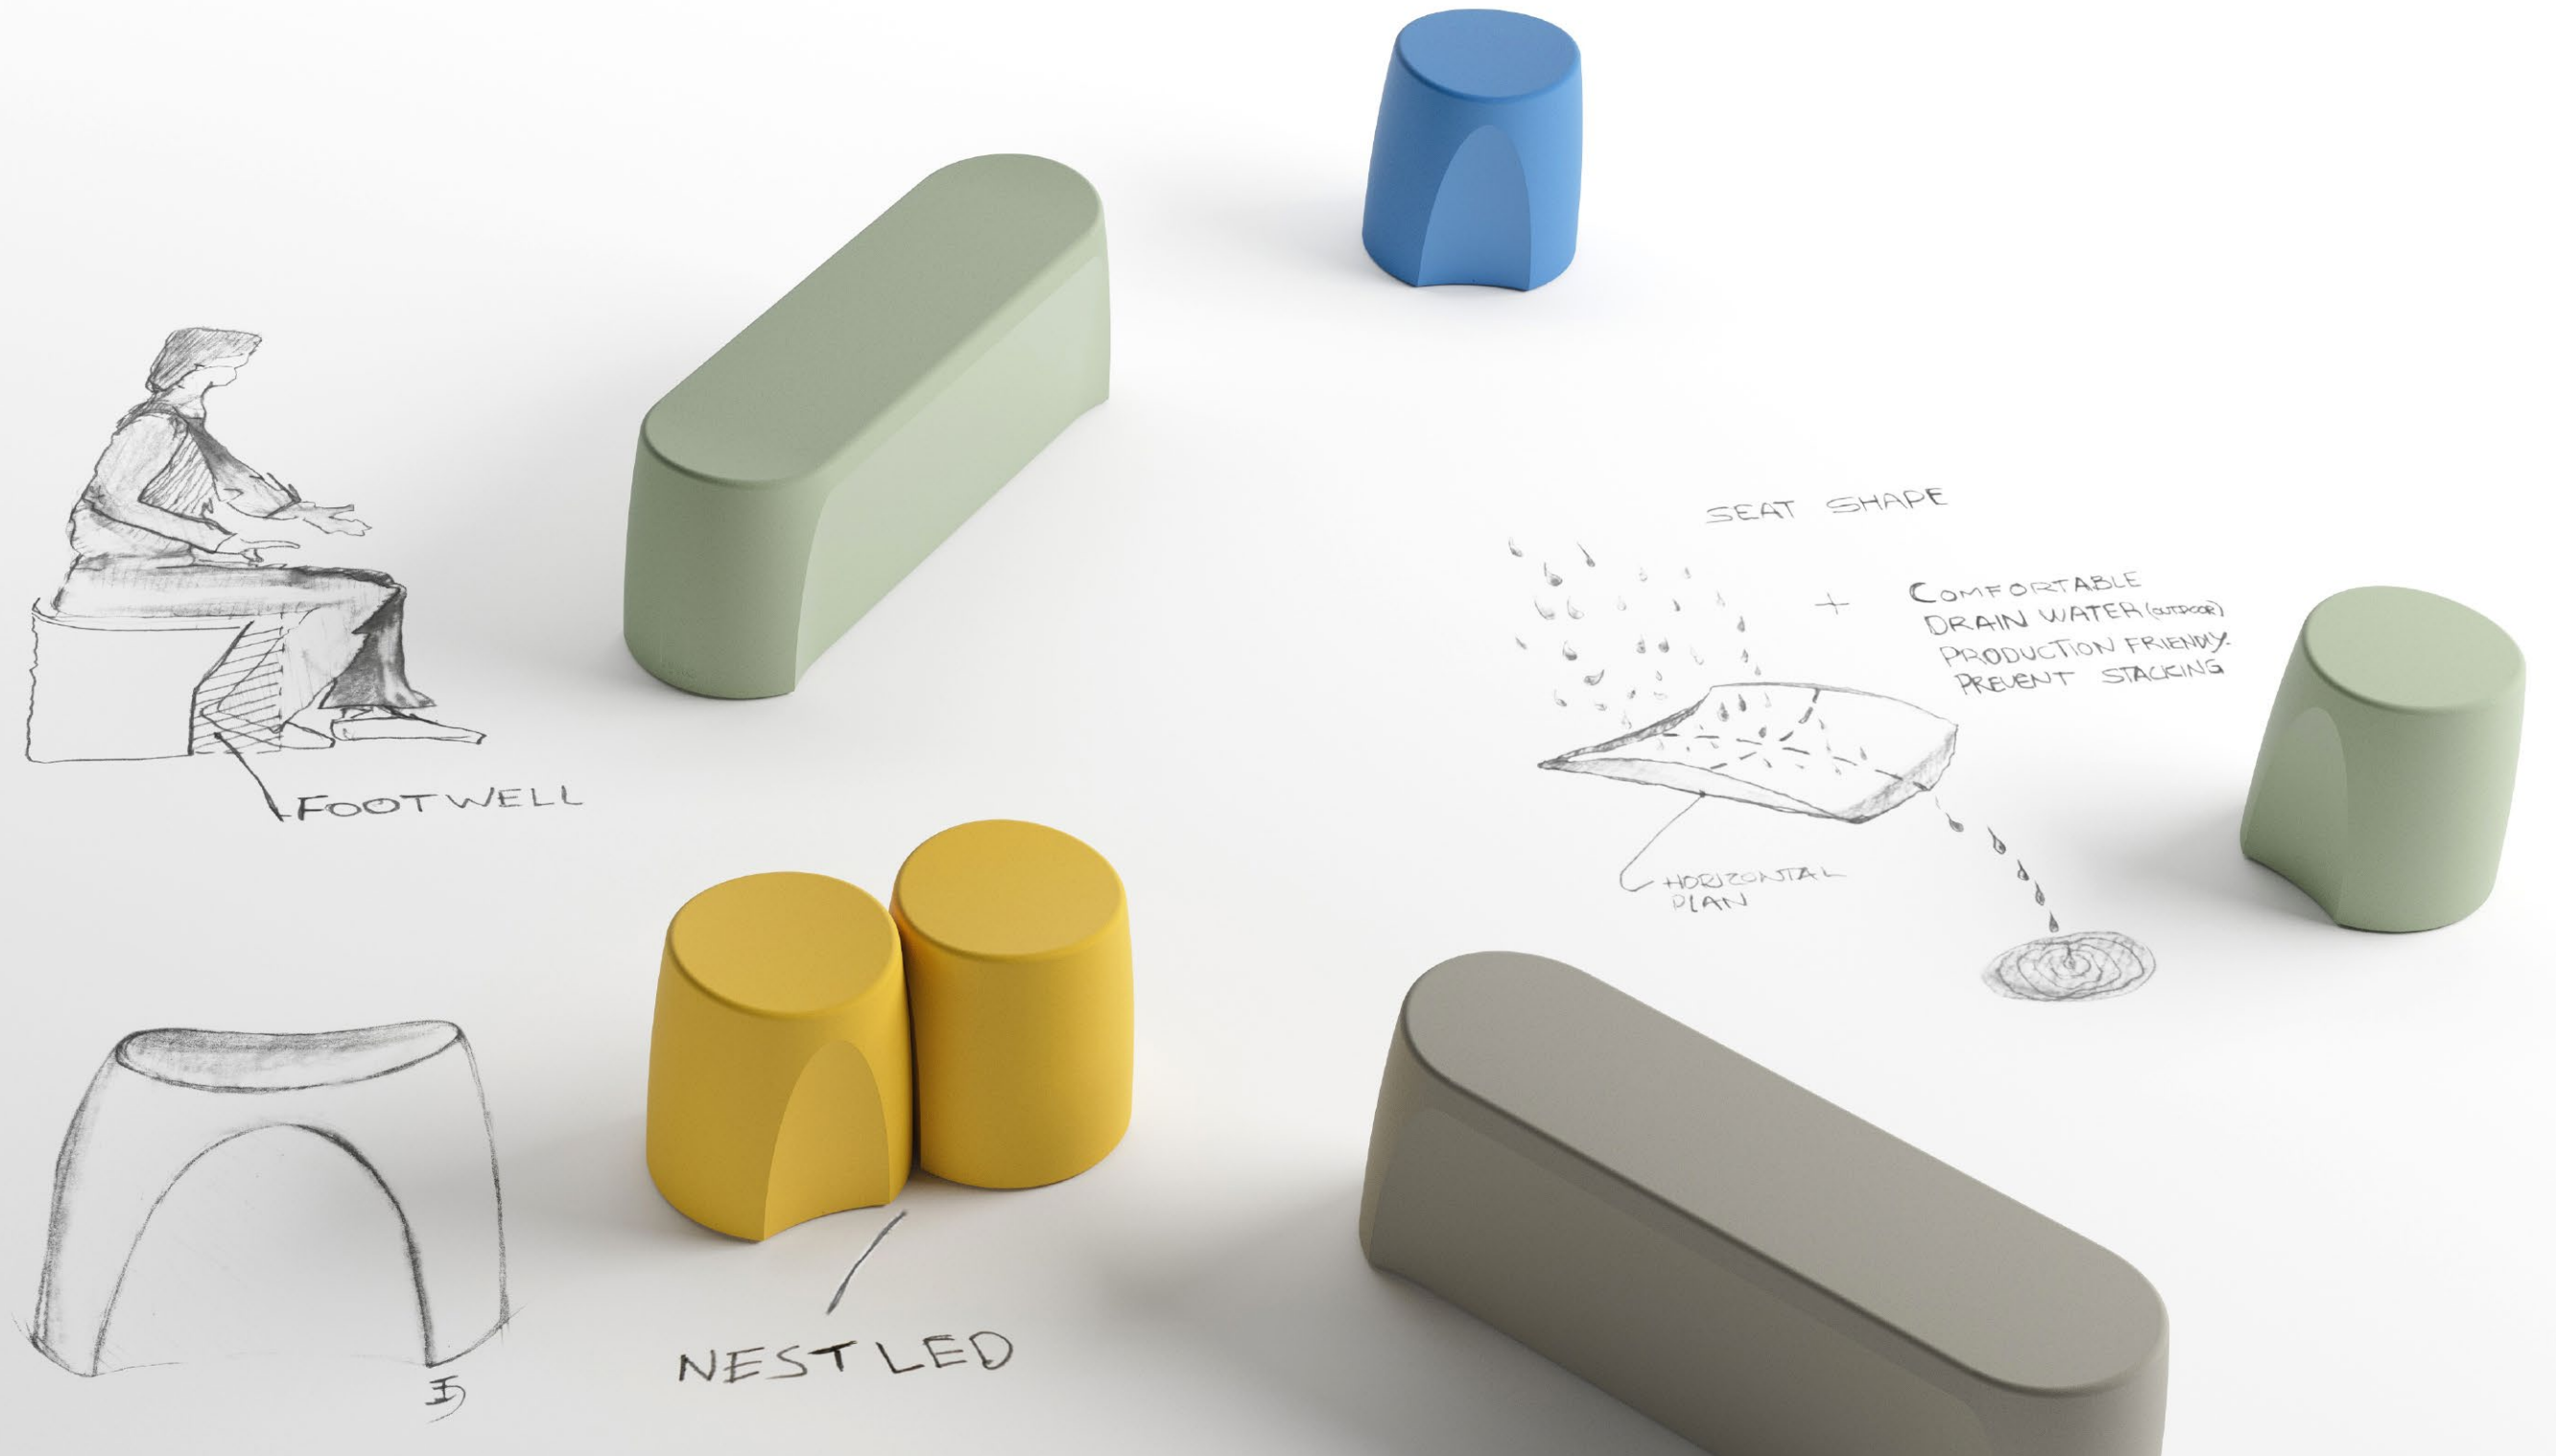

Furniture destined for public spaces needs to be more resilient than most. Exposure to high levels of traffic, harsh weather and potentially disruptive behaviour can place significant demands on furniture, and product failures may lead to serious safety risks.

Come rain or shine, Ryno® products stay looking their best thanks to their inherent water-resistance and unique UV stabilised, anti-microbial material, and seat profiles are carefully shaped to deflect rainwater.

Heavily weighted as standard, the Ryno® range is designed to limit disruptive behaviour. For higher risk environments, products may be securely fixed to the floor using our hidden floor fixing method (patent pending).

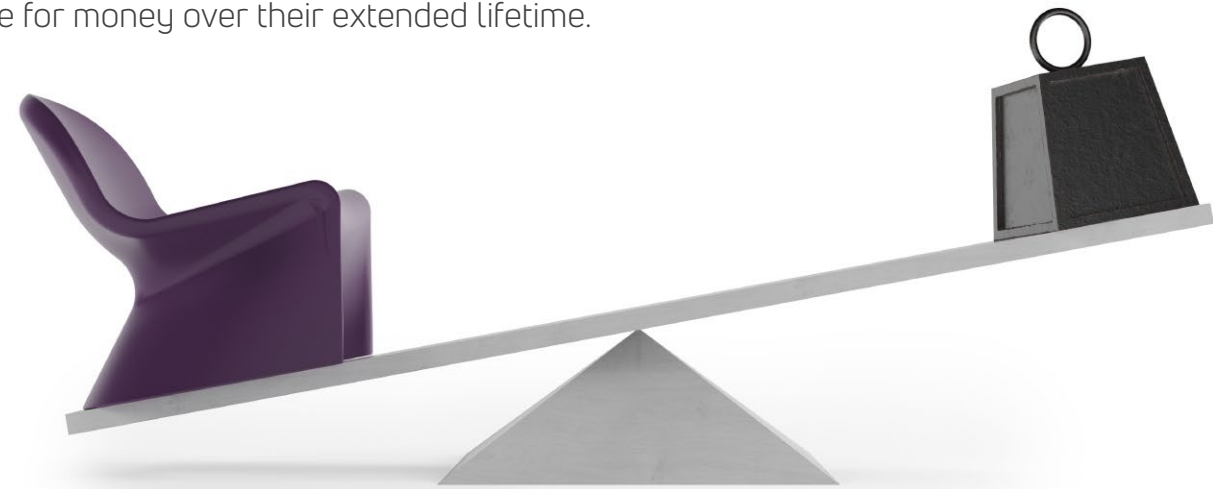

Designed by Ingemar Jonsson

# The Ryno® range

Ryno® products are made to the highest standards and designed to withstand the harshest treatment, representing true value for money over their extended lifetime.

### Heavyweight

Ryno products are heavily weighted to make them near-impossible to pick up or throw, helping to create safer environments.

### Weatherproof

Ryno products are totally water-resistant and UV-stabilised, making them suitable for indoor and outdoor use in all weather.

### Non-flammable

Our unique polymer is flame-retardant, compliant with UL94 HB and upholstered products are compliant with British Standard 5852:2006 ignition source 5.

### Damage-resistant

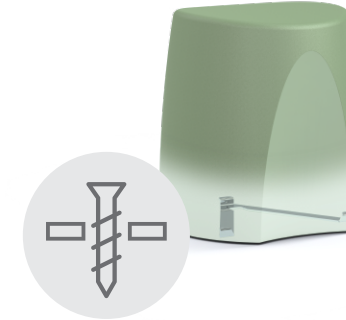

Their ultra-strong construction enables Ryno products to withstand extreme treatment. Smooth curves help to prevent stress points, distributing impact evenly throughout the products' outer shell.

### Hygienic

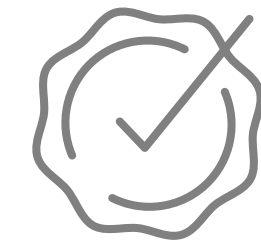

Ryno products are anti-bacterial (even beneath the surface) thanks to our unique polymer blend. Their water-resistant nature means they can easily be wiped clean and dry quickly, ready to be used again.

*Multi-purpose Ryno wipes available to purchase*

### Floor/wall fixed options

Using our hidden fixing methods (patent pending), Ryno products can be secured to floors and/or walls, preventing weaponisation and reducing opportunities for damage or concealment.

### Lifetime guarantee

All Ryno products are covered by a lifetime guarantee against manufacturing faults, providing additional peace of mind.

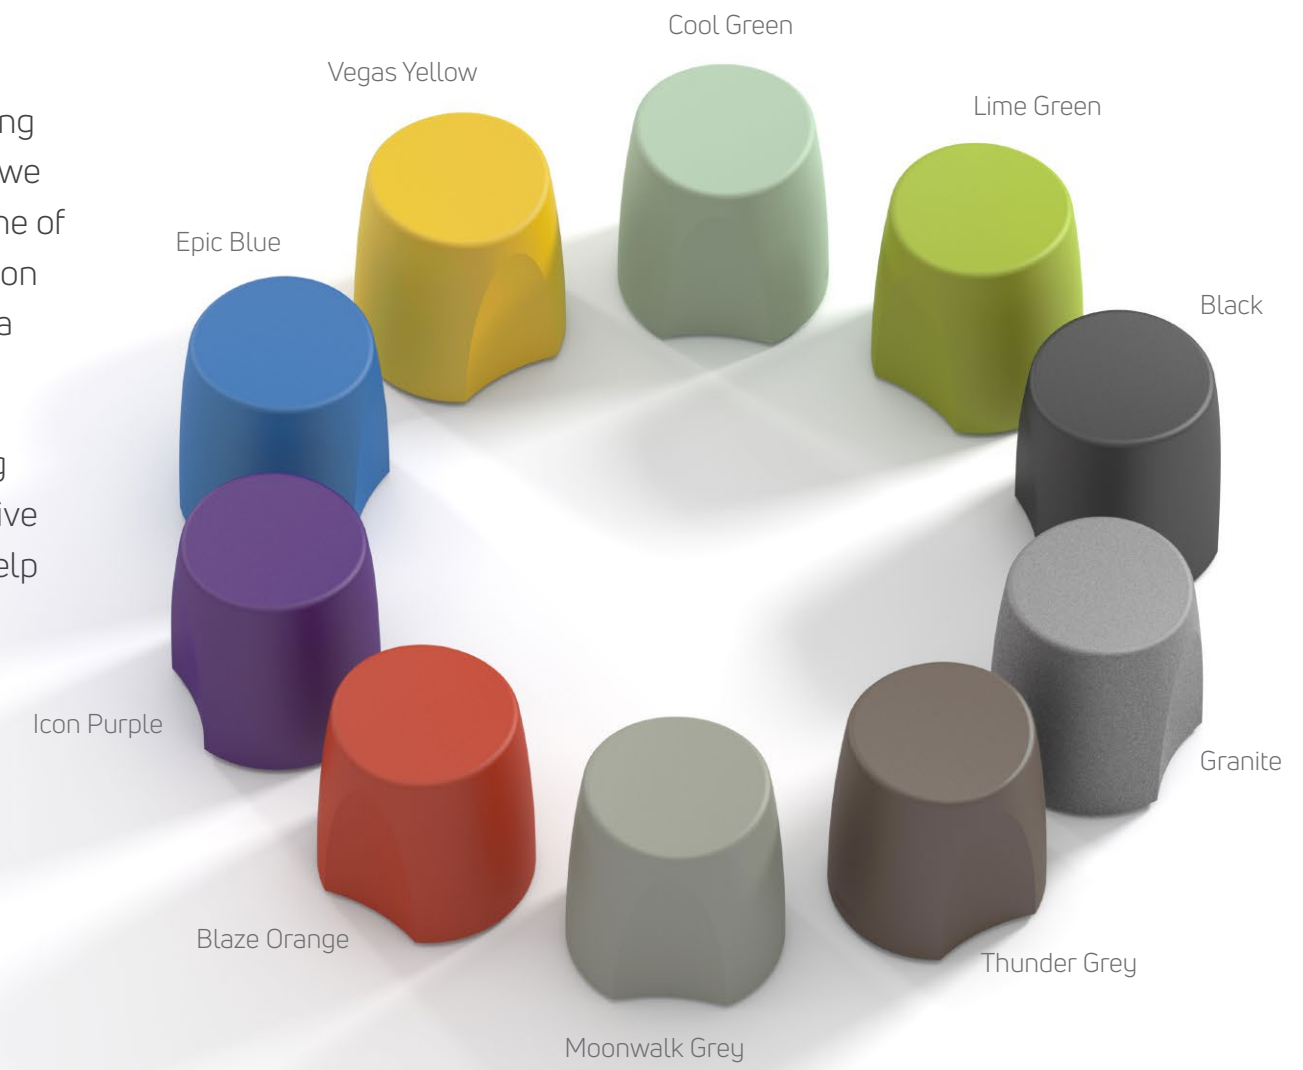

# Colour

Colour can play a key role in establishing the character of a space, which is why we enlisted the help of Seymourpowell, one of the world's leading design and innovation consultancies, to assist us in selecting a thoughtful range of colours.

Whether the aim is to create a soothing and reassuring space or provide inclusive stimulation, our versatile palette can help to achieve it.

seymourpowell

# Material

Ryno products are manufactured from a unique polyethylene compound specifically developed for high-risk applications. A combination of additives work together to create safe, durable and practical products suitable for both indoor and outdoor use.

### Recyclable

Thanks to the recyclable nature of polyethylene, Ryno products can be milled back into polyethylene powder and re-moulded to create new products.

A UV-stabilising additive protects Ryno products against the damaging effects of the sun's rays, limiting colour fading and brittleness when used for extended periods outdoors

Ryno products are UL94 HB compliant due to the inherently flame-retardant properties of our polymer.

The addition of Silver Oxide inhibits bacterial growth, preserving high levels of hygiene and infection control. Unlike surface treatments which may wear away, this anti-bacterial protection runs throughout all Ryno products.

# Ryno<sup>®</sup> stool

## KEY FEATURES & BENEFITS

- Ergonomically designed to prevent stacking and to deflect rainwater
- Durable polyethylene one-piece construction provides excellent strength and cannot be weaponised unlike a conventional stool
- Heavily weighted to 50kg as standard to deter misuse, with other weight options available
- Compliant with flammability standards UL94 HB
- Water-resistant and UV stabilised material – ideal for outdoor use
- Anti-microbial material provides protection throughout the product – not just on the surface
- Strength and durability tested for 500,000 cycles (BS EN 16139:2013 - Level 2)

## OPTIONS

- 10 vibrant shell colours
- Lightweight model
- Hidden floor fixing option

## TECHNICAL DETAILS

**Size**  
470H | 445W | 396D (mm)  
Seat height: 470mm

**Weight**  
50kg (standard model)  
25kg (midweight model)  
5kg (lightweight model)

**Materials**  
Shell – UV stabilised polyethylene with anti-microbial additive

## PRODUCT CODES

Blaze Orange	1RYS-FF-50-BR

Create lasting outdoor spaces that thrive in all weather conditions

# Ryno® bench

## KEY FEATURES & BENEFITS

- Ergonomically designed to prevent stacking and to deflect rainwater
- Durable polyethylene one-piece construction provides excellent strength and cannot be weaponised unlike a conventional stool
- Heavily weighted to 75kg as standard to deter misuse, with other weight options available
- Compliant with flammability standards UL94 HB
- Water-resistant and UV stabilised material – ideal for outdoor use
- Anti-microbial material provides protection throughout the product – not just on the surface
- Strength and durability tested for 500,000 cycles (BS EN 16139:2013 - Level 2)

## OPTIONS

- 10 vibrant shell colours
- Lightweight model
- Hidden floor fixing option

## TECHNICAL DETAILS

**Size**  
470H | 1400W | 396D (mm)  
Seat height: 470mm

**Weight**  
75kg (standard model)  
50kg (midweight model)

Other weight options available

**Materials**  
Shell – UV stabilised polyethylene with anti-microbial additive
